

ANUP KUMAR

Software Engineer — Generative AI — Backend Integration — Java — Spring Boot — LLMs

Kolkata, West Bengal, India

+91-7070538130 anupkumar943060@gmail.com

LinkedIn GitHub

Professional Summary

Software Engineer with 1.5+ years of experience designing AI-enabled enterprise applications and scalable backend systems. Experienced in developing Retrieval-Augmented Generation (RAG) solutions, integrating Large Language Models (LLMs), and building RESTful APIs and microservices using Java and Spring Boot. Hands-on expertise in Azure OpenAI, Azure AI Foundry, Azure AI Document Intelligence, vector databases, FAISS, Apache Kafka, Docker, CI/CD, AWS and Microsoft Azure.

Technical Skills

Languages: Java 8/11/17, Python, SQL, JavaScript

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, REST APIs, JWT, Microservices

Generative AI: LLMs, Prompt Engineering, RAG, Semantic Search, FAISS, Embedding Models, Azure OpenAI, Azure AI Foundry, Azure AI Document Intelligence

Messaging: Apache Kafka, Event-Driven Architecture

Cloud: AWS (EC2, S3, RDS, IAM), Microsoft Azure

Databases: MySQL, MongoDB, Couchbase

DevOps: Docker, Docker Compose, Kubernetes (Basics), Terraform (Basics), Maven, Git, CI/CD, Grafana, Swagger/OpenAPI

Professional Experience

Tata Consultancy Services (TCS)

Feb 2025 – Present

Assistant System Engineer

- Collaborated with US stakeholders to design and deliver AI-enabled enterprise applications supporting 500+ global users.
- Built enterprise RAG pipelines using Azure OpenAI, Azure AI Foundry, FAISS and vector embeddings.
- Developed scalable Spring Boot microservices with JWT authentication and REST APIs.
- Integrated Azure AI services with Java backend applications for document ingestion and AI workflows.
- Implemented Apache Kafka for asynchronous communication.
- Optimized MySQL and Couchbase queries using indexing and tuning.
- Configured CI/CD pipelines, Docker deployments and Grafana monitoring.

Dataman Computer Systems

Jun 2024 – Aug 2024

Software Development Intern

- Developed a Medical Audio Dataset platform using Spring Boot, React and MySQL.
- Built REST APIs and integrated AWS S3 storage.
- Improved dataset processing and reduced storage cost.

Projects

Enterprise AI Document Assistant (RAG + LLM)

Technologies: Java 17, Spring Boot, Azure OpenAI, Azure AI Foundry, FAISS, MySQL, Docker, JWT

- Developed an enterprise RAG platform supporting PDF and Word document question answering.
- Implemented document ingestion, chunking, embedding generation, semantic search and prompt orchestration.
- Integrated FAISS vector database and secure REST APIs.

OrderFlow – Event Driven Order Management

Technologies: Java 17, Spring Boot, Kafka, MySQL, MongoDB, Docker

- Built Order, Inventory and Authentication microservices.
- Implemented Kafka-based asynchronous communication.
- Integrated JWT authentication and Swagger documentation.

Certifications

Microsoft Certified: Azure AI Engineer Associate (AI-102)

Education

Master of Computer Applications (MCA)

Harcourt Butler Technical University

2022–2024

Bachelor of Science in Statistics (Honours)

Patna University

2018–2021
